SCRUM Meeting 3 for Project 3
Prepared by: Sudeep Sirivella
Meeting Date: 11/9/25

Meeting Attendees

1. Sudeep Sirivella
2. Joshua Samuel
3. Shashvat Chathapuram
4. Sonith Guduru

Meeting Agenda Items

- Do a status check on progress from previous tasks
- Plan out future tasks
- Delegate tasks

Status Update Since Last Meeting

Accomplishments:
- Create category screen
- Add navigation menu
- Add search and filters
- Build product details page
- Build cart and checkout screens
- Add payment confirmation screen

Tasks Completed:

Task Description	Assigned to	Completed? (yes/no)
Layout and style the browsing categories screen.	Joshua & Sudeep	Yes
Implement a navigation bar or side menu that is simple and clear to navigate.	Joshua & Shashvat	Yes
Allow users to search for and filter items through the kiosk interface.	Joshua & Sonith	Yes
Display item information, images, and options when a user selects a product.	Sudeep & Shashvat	Yes
Allow users to view their order and checkout.	Sudeep & Sonith	Yes

Show to the user that a payment was processed successfully or not successful.	Shashvat & Sonith	Yes

Before The Next Meeting

Plans:
- Add help and support section
- Improve accessibility
- Add idle screen animation
- Set up database
- Design database schema
- Write migration scripts

Task Assignments:

Task Description	Assigned to
Include a need-help button or more-help screen.	Joshua & Sudeep
Make sure fonts, colors, and button sizes meet accessibility standards.	Joshua & Shashvat
Create an attract screen for the duration that a kiosk is not in use.	Joshua & Sonith
Create a database for storing products, users, and transactions.	Sudeep & Shashvat
Define the tables, fields, and relationships between the data.	Sudeep & Sonith
Automate the process to create or update the schema.	Shashvat & Sonith

Minutes from Previous Meeting

Sudeep Sirivella called the meeting to order. The team reviewed the agenda, which had a status check on previous tasks, and then planned for the next tasks and delegated new tasks. It was confirmed that all tasks from the previous meeting were completed. Kiosk requirements have been defined, initial wireframes are sketched, the project environment is set up (including the Git repository and all dependencies), and the home screen has been built. The team moved on to plan the tasks for the next sprint. There were a couple goals that were established. Create the category screen, add a navigation menu, implement search and filter functionality, build the product details page, build the cart and checkout screens, and add a payment confirmation screen. Following the planning discussion, Sudeep led the delegation of the new tasks. The work was assigned in pairs. With all tasks planned and assigned, the meeting was adjourned.
